DEVELOPMENT OF THE MEETING AND AGREEMENTS

1. Review of things created to date and discuss problems that have showed up

During the meeting there was a discussion about how the sprint was going and the biggest problems that were encountered in terms of organization and development.

The main problems were the lack of communication and low work invested in the project to date.

We have compromised to work hard during the weekend and rest of the sprint, now that we have not more exams, so we will have something done and finished for the following up of the next Monday at SEPP class.
