DEVELOPMENT OF THE MEETING AND AGREEMENTS

1. Review of things created to date and discuss problems that have showed up

During the meeting there was a discussion about how the sprint was going and the biggest problems that were encountered in terms of organization and development.

The found that we had very few to be done and would wait until the publication of the grade of previous sprints and ask Pablo a list about the problems that he have found and solver them.

The only problem that we had was that Mario could only use during a week the video editing software he was using. So another member had to create another free account for him.
